Research Publications and/or Creative Works Notes

1. Consistent with the American Psychological Association's (APA's) Ethical Principles and Code of Conduct (2010; Standard 8.12), authorship credits on the following publications indicate that I performed substantial contributions to the works listed. For each publication, these contributions took the form of A) conceptualization of the work, B) substantial original writing, C) methodological design & analysis, D) data collection, E) editing of the work, and/or F) supervision/mentoring/advising of any of the above. Specific contributions are listed for each publication. Therefore, the specific contribution(s) is noted with the corresponding letters (above) for each individual work listed below.

2. Consistent with APA Ethical Standard 8.12b, the order of authorship on the listed publications reflects the relative scientific or professional contributions of the individuals involved. However, consistent with APA Ethical Standard 8.12c, students are listed as principal author(s) on publications resulting from their doctoral dissertations, master's theses, and/or research tasks. In these cases, contributions to the work by the faculty member

(Neidert) may have been more substantial than what is indicated by her relative position in the order of authorship
